

# COLOR MIXING INSTRUCTIONS

Thank you for choosing G&C Hair Color by Hair Bar NYC

Enclosed are the tools you need to mix color:

- G&C Hair Color Tube(s)
- G&C Color Developer 20 Vol
- 1 Color Bowl
- 1 Color Brush
- 1 Pair of Gloves

## HOW TO USE

Standard Colors  
1 - 10

1:1

High Lift  
11 - 12

1:2

### ALL COLORS:

**Roots:** 50ml (1/2 Tube) of color to 50ml of Developer

**All Over:** 100ml (Full Tube) of color to 100ml of Developer

**Process:** 35 minutes

### GREY RESISTANT HAIR:

**Process:** 45 minutes

### HIGH LIFTS:

**Roots:** 50ml (1/2 Tube) of color to 100ml of Developer

**All Over:** 100ml (Full Tube) of color to 200ml of Developer

**Process:** 40-50 minutes

\*Mix thoroughly for 1 minute to ensure the mixture is completely blended together.

# AFTER MIXING INSTRUCTIONS

Apply barrier serum around skin along the hairline, on the tip of ears and around the back of the neck. Refrain from getting any on the hairline, so your color will saturate properly.

Start with dry unwashed hair.

- Wear a shirt you don't mind getting color on, preferably with a button up on the front.
- Prep your hair into 4 sections with clips .
- Make sure your gloves are on.

## AFTER MIXING CONTENTS TOGETHER

Take one front sections down, first, color your new growth (roots) using either the applicator bottle, or the bowl and brush.

- Work your way down in rows about 1/4 inch apart, one section at a time.
- Leave color on (as instructed above).

**For all over hair:** Cover roots first and after all of the roots have been covered start in the back running the color down the stand. (All over mix ratio should be done beforehand).

## TO REFRESH THE REST OF THE HAIR AFTER ONLY DOING ROOTS:

- Step into the shower dampen the hair that hasn't been colored.
- With the remaining color you can apply to the rest of your hair and comb the root color to the ends for an additional 10 minutes.

(Clean your skin with a damp paper towel or towel to remove it off the skin while waiting)

## WASH HAIR WITH SHAMPOO AFTER TIME IS UP (Squeeze out excess water)

Apply Mask in hair, you can work the mask into the hair with fingers or a comb.

Leave the mask on for 5-10min.

## TIPS:

Wear a shirt that buttons or zips up the front to make cleanup easy.

Begin with dry, day old hair. It is not necessary to wash hair immediately before coloring; however, hair should not have any styling products or dry shampoo (can stop color from achieving optimal coverage).

Rinse out your gloves after application, use them for when you are washing out the color, to prevent stains in your hands.

A little bit of shampoo can be applied along the hairline before washing the color out, rubbed in a circular motion to loosen any color along the hairline, wipe and wash as directed.

Use Ultimate Repair System or Silk Touch System to prevent fading and dulling. Both safe for Keratin and Color.

For optimal shine can be followed up with Diamond Botox Treatment to seal the color.

\*If you have chemically straightened or permed hair, contact HAIR BAR NYC customer service team through email or text to recommend the best course of action.
